6,35 BROWNING / .25 AUTO - FMJ

Bullet Weight: 50grs - 3,30g

Cartridge weight: 5,20g - Cartridge length: 23,00mm

7,62 x 25 TOKAREV - FMJ

Bullet Weight: 85grs - 5,50g

Cartridge weight: 10,60g - Cartridge length: 35,00mm

7,65 BROWNING / .32 AUTO - FMJ

Bullet Weight: 73grs - 4,75g

Cartridge weight: 7,60g - Cartridge length: 25,00mm

.32 S & W LONG - WC

Bullet Weight: 100grs - 6,50g

Cartridge weight: 10,35g - Cartridge length: 24,30mm

.32 S & W LONG - LRN

Bullet Weight: 100grs - 6,50g

Cartridge weight: 10,35g - Cartridge length: 32,51mm

9 mm BROWNING COURT / .380 AUTO - FMJ

Bullet Weight: 92grs - 6,00g

Cartridge weight: 9,40g - Cartridge length: 24,90mm

9 mm LUGER / 9 mm PARA - SP

Bullet Weight: 100grs - 6,50g

Cartridge weight: 11,00g - Cartridge length: 27,50mm

9 mm LUGER / 9 mm PARA - SP

Bullet Weight: 124grs - 8,00g

Cartridge weight: 12,65g - Cartridge length: 28,40mm

9 mm LUGER / 9 mm PARA - LRN

Bullet Weight: 124grs - 8,00g

Cartridge weight: 12,65g - Cartridge length: 28,00mm

9 mm LUGER / 9 mm PARA - JHP

Bullet Weight: 115grs - 7,50g

Cartridge weight: 12,25g - Cartridge length: 26,90mm

9 mm LUGER / 9 mm PARA - FMJ

Bullet Weight: 115grs - 7,50g

Cartridge weight: 12,15g - Cartridge length: 29,69mm

FMJ = Full Metal Jacket

WC = Wadcutter

SP = Soft Point

JHP = Jacketed Hollow Point

LRN = Lead Round Nose

.45 AUTO / .45 ACP - FMJ

Bullet Weight: 230grs - 14,90g

Cartridge weight: 20,85g - Cartridge length: 32,35mm

.45 G.A.P. - FMJ

Bullet Weight: 230grs - 14,90g

Cartridge weight: 20,50g - Cartridge length: 28,89mm

RIMFIRE

.22 WMR

Bullet Weight: 45grs - 2,92g

Bullet material: Lead-coppered

Case material: Brass

.22 WMR JHP

Bullet Weight: 40grs - 2,60g

Bullet material: Cu/Pb

Case material: Brass

.22 WMR FMJ

Bullet Weight: 40grs - 2,60g

Bullet material: Cu/Pb

Case material: Brass

.22 LR HV

Bullet Weight: 36grs - 2,33g

Bullet material: Lead-coppered

Case material: Brass nick led

.22 LR HV HP

Bullet Weight: 38grs - 2,45g

Bullet material: Lead

Case material: Brass

.22 LR SB STANDARD

Bullet Weight: 40grs - 2,56g

Bullet material: Lead

Case material: Brass

.22 SHORT

Bullet Weight: 28,1grs - 1,80g

Bullet material: Lead

Case material: Brass

.22 LR SB CLUB

Bullet Weight: 40grs - 2,56g

Bullet material: Lead

Case material: Brass nick led

PISTOL & REVOLVER BULLETS

Bullet FMJ

Full - jacketed bullet. Its lead core is covered with a metallic jacket. Due to its rigid design, the bullet makes a smooth penetration without devastating the tissue, as it does not get deformed when hitting the target. The bullets with ogival-shaped front part are used in caliber's 6.35 Br., 7.65 Br., 9 mm Br, 9 mm Makarov, 7.62 x 25 Tokarev, 9 mm Luger, the bullets with the front part of truncated cone are used in caliber's 40 S&W, 38 Special, 357 Magnum and 9 mm Luger Subsonic.

Bullet SP

Semi - jacketed bullet - soft point. The bullet has a lead core. The lead core is bare in the front part. When hitting the target it gets deformed to make a mushroom - like shape, which ensures that kinetic energy is transferred fast. The bullet is characterized by the low ability to rebound. It is made in caliber's 9 mm Luger, 38 Special and 357 Magnum.

Bullet LRN

A homogeneous rounded-point lead bullet, whose surfaces are treated with a plastic so that lead abrasion may be reduce. Appropriate for all shooting opportunities. Supplied in 9 mm Luger and .38 Special calibers.

Bullet WC

A homogeneous lead bullet suitable for competition shooting. It features excellent accuracy and produces circular bullet hole when hitting the target. The caliber supplied in 38 Special.

Bullet TFMJ

Bullet determined to ecological version of cartridges with primer type NONTX. Copper capping disc covers the bottom part of lead core, thereby eliminates lead vaporization to the shooter's surroundings while shooting.

Bullet JHP

A semi-jacketed bullet with an expanding hollow in its front part and a lead core fully covered with tombac jacket. There are few axial grooves on the jacket around the hollow. The bullet effect depends on the target resistance and terminal energy.
