

# FLASHLIGHT THAT WORKS WITH WATER

H<sub>2</sub>Only  
BATTERY

Emergency flashlight for General usage

This specific model is the best value for money, as it can last for at least 350 hours of total operation.

Considering the cost of conventional batteries that already exist on the market, and how many batteries we would need for 350 hours of operation of a regular flashlight, our solution is the best.

Does not contain any chemicals or toxic substances. The product is recyclable, approved with CE/ROHS and ANSI NEMA FL:2009 certifications, and is delivered in an airtight package.

- 0.5 Watt LED
- With ON/OFF switch
- Ready to use
- Continuous operation 60 hours (max)
- No batteries are needed, operating with water
- Renewable & recyclable
- Sustainable power source
- Pollution-free, no toxins, and chemicals
- Easy and safe to use even by children
