

GLOCK TACTICAL LIGHT II

Introducing the GLOCK Tactical Light II (GTL II), a familiar accessory with a new design and optimized features for maximum efficiency. Specially designed for GLOCK pistols with a mounting rail*. This new LED pistol light provides ~600 lumens for bright illumination and ~11,100 Candela for light concentration.

The GTL II features a high-quality aluminum housing with characteristic GLOCK serrations for better grip, seamlessly blending into the pistol design. It is precisely matched to the length and width of the G19/G45 slide, offering optimal handling and comfort, whether carried or holstered.

Key Features

Easy Mounting: The slide-on mounting solution eliminates the possibility of over-tightening due to screw mechanisms.

GLOCK RTF Structured Surface: Provides a secure grip.

Waterproof Housing: Ensures durability in various conditions.

Simple Battery Replacement: A lightweight, compact battery offers long life and easy replacement.

Black Hard Anodized Aluminum: Durable and sleek design.

Ambidextrous Interchangeable Control Elements: Shooters can choose between two options and attach the preferred setup.

The GTL II stands for high performance and is a reliable companion in demanding conditions. The LED light helps you illuminate and identify your targets, giving you control in challenging situations.

Interchangeable Control Elements

Each GTL II set contains two push and two touch elements, allowing users to create their preferred configuration. The included GLOCK Tool enables easy disassembly.
