

MILKOR AGL 40MM

The Milkor 40mm Automatic Grenade Launcher is a robust and technological advanced heavy weapons system designed and developed to be easy deployable in any operation.

The AGL can be equipped with advanced fire control systems allowing greater accuracy and allowing for airburst munitions capability.

The AGL has a unique feeding system that allows for a greater amount of ammunition to be used before replacing an ammunition belt.

Low Component, Easy to Maintain
No headspace / timing adjustment required
Open Breech Firing
Soft Mount Recoil Mitigation Cradle
NATO Standard Tripod Mount

Caliber: 40mm
Weight: Gun 27kg, Cradle 8.5kg, Tripod 13kg
Total Weight: 48.5kg
Type to connection to tripod: NATO Pintle
Length: 975mm
Width: 215mm
Barrel length: 410mm
Action: Short Recoil

Rate of Fire: Cyclic 400 - 450 rpm
Rapid 70 rpm
Sustained 50 rpm

Ammunition: 40 mm HV Range
Maximum range: 2200mm
Effective range: 1500 mm
Muzzle velocity: 240 m /s
Bore diameter: 40mm
