

# Automatic Grenade Launcher AGK-30

AGK-30 can only fire burst, but the rate of fire can be from 50 to 400 grenades per minute. The interior of the barrel is chrome plated, which provides long service life and precision of the weapon. The weapon is fed from a belt with the capacity of 29 grenades, placed in the ammunition box. The launcher can fire grenades with anti-personnel and training projectiles. The design of the tripod enables quick change of combat position. Depending on tactical requirements and at the customer's request, the automatic grenade launcher can be mounted to various types of combat vehicles.
