

FALCON Optics 20-60×60

- Daytime observation telescope, mainly terrestrial, for spotting at long distances.
- Easy to use, lightweight, with carrying case and tabletop tripod for stable observation.
- Central focusing system with a convenient rotating knob in front of the eyepiece.
- Extendable sunshade on the objective lens to eliminate reflections.
- Twist-up eyecup for comfortable viewing with glasses.
- Waterproof construction for worry-free outdoor use.
- Wide magnification range from 20× to 60×. Smooth switching between magnifications by rotating the eyepiece ring.
- Screw-on eyepiece cap made of hard synthetic material for maximum protection.
- Objective lens cap made of hard synthetic material with clips for safe and easy placement.

Spotting Scope includes the following technical details:

Model: 20-60×60

Magnification: 20× to 60×

Objective lens diameter: 60 mm

Prism type: Porro BaK4

Lens groups: 8 pieces in 5 groups

Lens coating: BMC (presumably broadband multi-coating)

Focus system: Central (center)

Focus lens: Internal

Field of view: 1.8° – 0.9°

Exit pupil diameter: 3 mm to 1 mm

Eye relief: 14 mm

Resolution: ≤ 3.7"

Nitrogen filled: No

Minimum focal length (close focus): 6 m / 18 ft

Relative brightness: range listed as 9–1 (likely exit pupil ratio)

Size: 340 × 90 × 165 mm

The package in the color box includes:

- FALCON Optics Spotting Scope 20-60×60
- Tabletop tripod
- Carrying and storage case
- Lens cleaning cloth
- Instruction manual
