SKU: MCKAPOLLO

INTRODUCING THE APOLLO

APOLLO. A stand alone 16" barrel 9mm PCC (Pistol Caliber Carbine) that takes Glock magazines. Along with a 10" SBR version and a 10" with faux suppressor, it will be available in Q1 2024. With direct design influence from our world famous MCK (side folding stock, MCK ergonomic front handgrip and Glock inspired pistol grip). The MCK APOLLO will appeal not only to the hundreds of thousands who already own an MCK but to the entire PCC market, with features such as a direct blowback system, a charging handle that can be assembled to either the left or right side, the use of Glock magazines as low as 10 rounds, an ambidextrous magazine release button and a spare magazine holder. While the ergonomic handgrip can accommodate an MCK laser or flashlight, our 14" bottom rail can be used to attach your grip at any preferred position as well as side M-Lok slots for an assortment of accessories. Our 25.5" aluminum top rail allows you to add any optic you want, the MCK APOLLO has more usable real estate than any other PCC on the market.

// AGADA

NEW

SKU: AGADA

Pictured with optional ZUES optic platform by CAA USA

INTRODUCING THE AGADA (Pronounced ah-ga-da)

The AGADA's outside-the-box design takes rifle design to new heights and is the largest evolutionary step in modern firearms in over 500 years. Boldly going where no rifle has gone before. The AGADA will be the most comfortable firearm to ever touch the market. CAA USA has drastically redesigned every single part of the rifle that comes in contact with the shooters body including the stock, cheekpiece, pistol grip, trigger and forward grip. All components have been radically altered from traditional standards to facilitate a natural "boxing like" ergonomic feel that'll increase accuracy and consistency in any level of shooter. The AGADA can easily and quickly adjust to any size shooter and comes in 3 basic configurations. A 16" rifle, 10" SBR, and a 10" rifle with faux suppressor pinned and welded to an OAL of 16". This ergonomic rifle will come in right-handed and left-handed options.

LEGEND IN THE MAKING

The AGADA was designed and engineered by CAA USA CEO, LTC. (Ret.) Mikey Hartman. Hartman, a 22 year Veteran of the IDF (Israeli Defense Force). Of his many accreditations, he developed and was the Commander of the IDF Sharp Shooting & Marksmanship school in Israel. He quite literally wrote the entire shooting doctrine of the IDF. During his tenure with the school, LTC. Hartman trained over 500,000 IDF soldiers and thousands of United States troops as well. The AGADA is the product of that experience.

ENTERING 2024 INTO THE GUN MANUFACTURING WORLD

We at CAA USA are very proud to move into the gun manufacturing world.

After becoming the world leader in handgun conversion kits, it was a natural metamorphosis to move into the 9mm/10mm PCC manufacturing capabilities. And soon .223 rifles, all will be built and designed with the MCK in mind.

The Apollo (9mm), The Hammer (10mm), The Cobra (.223), as well as the outside-the-box, most ergonomic rifle ever built, The Agada (meaning legend in Hebrew), will be a great addition to anyone's collection. With a retail price of under \$900, it will be a must have.

In the early months of this year, we will release our new Apollo rifle. Making 2024 the most exciting year for CAA USA. We will continue to design and manufacture all our products in the USA.

// NEW RELEASES 2024 MCK

In 2024, we will continue with our product release schedule and come out with a new MCK model every 2-months, as we have done over the past 5 years since the MCK release (27 different chassis that fit over 160 different handguns). Every new model we engineer at CAA USA comes from requests from our customer base. We at CAA USA have been very fortunate to become the world leader in Micro Conversion Kits, a fact that we are very proud of.

Starting off with the PSA Dagger and Shadow Systems launch. We are raising the bar in handgun conversion kit compatibility.

Adding and expanding on the innovative models to be released in 2024 are Micro Conversion Kit models for High Point in Q2, Ruger 5.7 and PSA 5.7 Rock both coming in Q3. Finally CAA USA will round out the year with the Taurus TX22 in Q4.

Engineered and designed in the USA will always be our badge of honor.

MADE IN USA

PSA DAGGER

Released in 2021 the PSA Dagger has quickly become one of the most popular Glock clone handguns on the market. With both full size and compact models available, its modularity pairs perfectly with the MCK. Coming Q1 2024 in both Gen2 & Gen3 configurations.

SHADOW SYSTEMS

Hitting the market in 2020 the 920 series from Shadow Systems has grown into one of the most popular handguns on the market. With match grade components standard, the accuracy achieved with the MCK will be second to none. Coming Q1 2024 in both Gen2 & Gen3 configurations.

HI-POINT

Released over 30 years ago in 1992, and more than 4 million handguns in the marketplace. The MCK will be a great upgrade for a handgun that may just be sitting in the safe. Coming in Q2 2024 in Gen2 configuration.

NEW RELEASES CONT.

PSA 5.7 ROCK

Having just released in 2022 the PSA 5.7 Rock sets a standard for affordability in the realm of 5.7x28 handguns. Adding its low recoil and high capacity to the MCK lineup was an easy decision. Coming in Q3 2024 in Gen2 configuration.

RUGER 5.7

Hitting the market in december of 2019. The Ruger 5.7 was the first traditional styled handgun chambered in 5.7x28 since 2012. With magazine capacity of up to 20rds, it's a highly anticipated addition to the MCK family. Coming in Q3 2024 in Gen2 configuration.

TAURUS TX22

Released in 2019 the taurus TX22 is the latest 22LR handgun made by Taurus. With a magazine capacity of up to 16rds and traditional styling, the TX22 will be a great addition to the MCK family. Coming in Q4 2024 in Gen2 configuration.

// MCK GEN 3

SKU: MCKGEN3

AS SHOWN
SKU: MCKGEN3BL

When designing the MCKGEN3 we at CAA USA tried to take into account all of the comments we have received from you our loyal customers. This valuable input was essential when designing the MCKGEN3. Our new "CAR-WASH" cleaning system, with a radically changed charging handle and the ability to give our customers the option to use their Micro Red Dot slide mounted optic while inserted into the MCKGEN3, will bring the MCK to even greater heights than the Gen 1 or Gen 2. We truly believe the MCKGEN3 will take America and the world by storm as did the Gen 1 and Gen 2. Reaffirming that the MCK is the most popular Conversion Kit ever made. We are extremely proud that the MCKGEN3 as well as the rest of the MCK family is made 100% in the USA.

ADVANTAGES OF GEN 3

Gen 3 MCK exceeded conversion kit expectations by developing the following features:

- For the first time, the MCK can accept a slide with a micro red dot/ RMR mounted on it.
- The shooter can also aim with their zeroed RMR while using the Gen 3. No need for an additional optic.
- Built-in handgun cleaning solution, utilizing a brush/bristle system. The robust bristles clean the front of the slide during cycling.
- Ships with a new ambidextrous stabilizer/stock option allowing for right and or left side folding (in the past, only right)
- The Gen 3 stabilizer/stock has two height options. In the lower position when shooting with RMR/slide mounted optic or in the upper position when using any type of iron sights /pop up sights or any red dot/optic on top picatinny rail.
- 4.6-inch Aluminum rear and front top picatinny rails to accommodate any optic or sighting preference.
- The stabilizer features an external brush for cleaning the slide as well as a holder for the Gen 3 charging handle.
- Ships with a new Gen 3 charging handle that utilizes a backplate for handguns with RMR/slide mounted optics, as well as a standard polymer Gen 2 handle for use when not using a slide mounted red dot.
- The Gen 3 features all the Gen 2 advantages, including an aluminum top rail. Spare magazine holder with release button. Suppressor capable (increased to fit 1.56-inch diameter) and ability to fire with the stabilizer/stock folded.

ADVANTAGES OF GEN 2

Gen 2 MCK removed all limitations from conversion kits by pioneering the following features:

- Comes with a new extended stabilizer which allows the user to fire the Gen 2 MCK in the folded and locked position. The new stabilizer is compatible with Gen 1 MCKs as well
- The rear door extends back an additional 15 degrees, making it easier to insert and extract the handgun
- The Gen 2 MCK accommodates suppressor height sights
- Featuring a new charging handle which makes more surface contact with the rear of the handgun slide
- Includes an aluminum top picatinny rail for improved stability, durability, and accuracy
- Accepts CAA USA's new brass catcher, made especially for our latest generation MCK (sold separately)
- Features an improved spare magazine holder that operates with a mag catch and magazine release button
- The Gen 2 MCK is suppressor friendly and can accommodate a suppressor up to 1.38" diameter

ADVANTAGES OF GEN 1

The first generation MCK was introduced in December of 2018 and took the market by storm with these advantages:

- No pistol disassembly required - Just place pistol into the kit, lock, and go
- Allows for multiple handgun models into one platform Ergonomic Finger Groove Grip for more stability
- Top Picatinny rail, allowing a combination of sights and/or optics
- Side Picatinny rails for mounting additional accessories, i.e... thumb-rests
- Front spare magazine holder for a faster reload
- Built-in charging handle allowing for quicker assembly/disassembly
- Exposed slide release for direct contact and easier use
- Right-folding and locking arm brace for easy concealment and carry
- Ambidextrous, fast and easy handling

// MCKARBINE

SKU: MC-KARBINE

DESCRIPTION:

The new MC-KARBINE combines the ever-versatile MCKGEN2 or GEN 3 with a 16" barrel and stock to create a PCC from your existing handgun without the need for a tax stamp. Simply swap out your factory barrel for the supplied 16" and insert it into the MCK for a shoulder able platform that not only increases your stability but also added velocity and extended range. Currently available for the Glock 19 Gen3 and Gen4 models. With additional Glock & Taurus options coming in 2024, as well as a slide over barrel cover. The MC-Karbine is available in 3 different options. First the entire package consisting of an MCKGEN2 or MCKGEN3 both with a stabilizer, a Gen2 or Gen 3 Stock and the 16" barrel for Glock 19 Gen3 & Gen4. Second for those who already have their MCKGEN2 or MCKGEN3, get the Gen2 or Gen3 Stock and the 16" barrel for Glock 19 Gen3 & Gen4. Third but not least, those just looking to extend their range with their handgun we offer the 16" barrel for Glock 19 Gen3 & Gen4 as a standalone product.

// MCK TAC

SKU: MCKTAC

AS SHOWN
SKU: MCKTAC

DESCRIPTION:

The MCK TAC was born in the sense of concealment and maneuverability. The TAC features a one-point bungee style sling and Quick Detach sling swivel as well as a pair of thumb rests. It was made with VIP Protection in mind and is the most compact Micro Conversion Kit we have created to date. The TAC rear housing will fit all models of the MCK and has a small compartment where you can store up to three 9mm rounds, or ear plugs / batteries / etc. This rear housing opens in a swivel motion and does not need to be disassembled from MCK (That option does exist). By removing the rear housing with a simple push of a pin, you can attach any of our stabilizers or stocks, and convert back to a standard MCK.

WHAT DOES TAC REPRESENT:

TACTICAL: With its small footprint, the TAC is a powerful force equalizer that can quickly be deployed from concealment, making it ideal for instinctive shooting and easier to manipulate in close quarters.

ACCURATE: The MCK TAC extends pistol accuracy at longer range by providing a more stable platform for your pistol, similar to MPO style shooting with your support arm locked. Additionally, the precision of a red dot optic gives the shooter even longer-range capability.

CONCEALMENT: The MCK TAC is only approximately 15 inches long, making it much easier to store in your vehicle, conceal on your person, in a safe, or staged throughout the house. Check your state laws for concealment regulations in your state.

// MCK

GLOCK

Gaston Glock, an Austrian engineer, founded Glock in 1963.

In the early 1980s, the semi-automatic Glock service pistol was born in response to meeting the needs of the Austrian military. Glock features a polymer frame and the developed **SAFE ACTION®** System which revolutionized the handgun market. In the mid-1980s Glock Pistols were introduced to the U.S. Market. Their innovation, durability and reliability immediately captured the attention of both the U.S. law enforcement and commercial markets.

Fast forward to the present day, Glock is currently on its 5th Generation of service pistols which are used worldwide by civilians, law enforcement, and military organizations.

// GEN 2 GLOCK 17/19

SKU: MCKGEN2

AS SHOWN
SKU: MCKGEN2WTP

DESCRIPTION:

The Glock 19 is the compact version of the full-size Glock 17. Loved and revered by many military and law enforcement agencies, the Glock 19 was adopted by the Swedish Army in the early 1990s. In the U.S. military, the Glock 19 took the place of the Sig P226 for our United States Navy SEALs standard sidearm. Fits models 17/19x/22/23/25/31/32/45.

// GEN 2 GLOCK 20/21

SKU: MCK21GEN2

SKU: MCK21GEN2R
INCLUDES SPARE MAGAZINE HOLDER

DESCRIPTION:

The 2nd generation of the MCK for the Glock 21 achieves the same compatibility as our first generation but allows for a suppressor to be attached to the handgun inside the unit. Featuring all the Gen 2 advantages over the Gen 1, the MCK21GEN2 is a must for serious large bore Glock fans.

// GEN 2 GLOCK26/27/33

SKU: MCK26/27GEN2

AS SHOWN
SKU: MCK26/27GEN20

DESCRIPTION:

The MCK26/27/33 GEN2 is one of the newest additions to our growing MCK Family. For the first time ever, we have developed an MCK that does not need a bottom rail or frame-lock to secure the firearm. Our MCK Gen 2 for the Glock 26/27/33 is the perfect accessory to enhance your concealed carry and features all the upgrades of industry standard MCKGEN2 platform. Fits Glock generations 2, 3, 4 and 5.

// GEN 2 GLOCK29/30

SKU: MCK29/30GEN2

AS SHOWN
SKU: MCK29/30GEN2CL

DESCRIPTION:

The MCK (Micro Conversion Kit) for the Glock 29/30 since its addition in 2021, has been a home run for those who like large bore for carry but wanting to maximize the effectiveness while reducing the recoil of the 45 acp and 10mm cartridges. Built on our Gen 2 platform, featuring an aluminum top picatinny rail, a Gen 2 stabilizer that allows you to fire while it is folded and locked, and the ability to suppress your handgun inside the unit. Fits models 29/29SF/30/30S/30SF in Gens 3 & 4.

// GEN 2 GLOCK34/35/41

SKU: MCK34/41GEN2

SKU: MCK34/41GEN2BL
INCLUDES SPARE MAGAZINE HOLDER

DESCRIPTION:

Competition shooters know that the Glock 34/35/41 are some of the most popular platforms across several shooting sports organizations and disciplines. Additionally, these models are also popular choices for home defense and law enforcement tactical units - making them the perfect match for the MCKGEN2 family. The MCK Glock 34/35/41 is suppressor friendly, accommodating suppressors up to 1.38" in diameter, and works with a brass catcher sold separately in our vast accessory line.

// GEN 2 GLOCK43/43x/48

SKU: MCK43/48GEN2

AS SHOWN
SKU: MCK43/48GEN2P

DESCRIPTION:

The MCK43/48GEN2 is CAA USA's first Micro Conversion Kit (MCK) for a single stack handgun! Utilizing the same locking technology found on our MCK for the Glock 26/27, the MCK43/48GEN2 has all of the same features and upgrades that you have come to love on our Gen 2 MCK platform, and the new slimmer design adds a whole new dimension to your Glock for the 43/43X/48. The MCK Glock 43/48 Gen 2 will continue in this wave of success while meeting the level of quality and attention to detail that you have come to expect from CAA USA.

// GEN 2 GLOCK44

SKU: MCK44GEN2

AS SHOWN
SKU: MCK44GEN2REALTREE

DESCRIPTION:

We are proud to introduce the MCKGlock 44. Novice and expert shooters have embraced the Glock 44 with great enthusiasm since its launch. The Glock 44 (chambered in 22 LR) blends practical range training, dependability, and cost efficiency. The MCKGEN2 combined with the Glock 44 handgun provides hours of shooting enjoyment while using a more cost-effective round.

SPRINGFIELD ARMORY

Springfield Armory was created in 1777 at the order of George Washington. In 1794, they began to manufacture muskets for the U.S and would supply small arms to the American military in every major conflict over the next 150 years.

Springfield Armory was closed by the U.S Government in 1968. In 1974 Springfield Armory was brought back by an independent buyer and has continued to make small arms and market innovations to the present day.

// SPRINGFIELD HELLCAT

SKU: MCKHELLCAT

SKU: MCKHELLCATO

DESCRIPTION:

Introducing the Springfield MCKHELLCAT. The Hellcat is the highest capacity micro-compact 9mm in the world. The 30-barreled pistol measures a mere 10" wide and weighs just 18.3 oz. empty yet features a class-leading capacity of 11+1 rounds with a flush-fitting magazine. The Hellcat MCK continues our compact concealed pistol MCK offerings. Fastest assembly/disassembly conversion kit on the market. Improving accuracy dramatically up to 200 yards. We are the exclusive licensee of the SB tactical stabilizer brace for the handgun conversion kits.

// SPRINGFIELD ARMORY 45

SKU: MCKSA45

AS SHOWN
SKU: MCKSA45FDE

DESCRIPTION:

The MCKSA45 fits barrel lengths of 3.8", 4", 4.5" and 5" across the XD, XD MOD2, and XDM model lines. Featuring a spare magazine holder that operates with a magazine button catch/release, the MCK for Springfield Armory has characteristics of our Gen 2 platform while being one of the most compatible conversion kits we have ever created. The Springfield Armory XD-45 Compact is true to the XD line with a grip safety, cocking indicator, ambidextrous magazine release and Ultra Safety Assurance trigger system.

// SPRINGFIELD ARMORY 9

SKU: MCKSA9

AS SHOWN
SKU: MCKSA9DM

DESCRIPTION:

The MCKSA9 fits barrel lengths of 3.8", 4", 4.5" and 5" across the XD, XD MOD2, XDM and XDM Elite model lines. It is the first time we have ever made a conversion kit for 4 different barrel lengths. The standard XD was introduced in 2001 and quickly gained a reputation for its ergonomics, quality and ease of use. Springfield capitalized on the popularity of its XD series by following up with the introduction of the XD MOD2 and the XDM series.

// MCK

SMITH & WESSON

Smith & Wesson was formed in 1852 as a partnership between Horace Smith & D.B. Wesson.

They would continue to develop and market revolvers until 1913 when they released their first Semi-Automatic handgun. The innovation continued until the present day with the M&P series line first unveiled in 2005. In 2018, Smith & Wesson launched the M&P 2.0. This upgraded version of the original featured a better trigger system, barrel, and textured grip.

// SMITH & WESSON SHIELD

SKU: MCKSHIELD

AS SHOWN
SKU: MCKSHIELDMOSSYOAK

DESCRIPTION:

The Micro Conversion Kit for the M&P Shield is the thinnest MCK that we have ever produced due to the slim nature of the handgun itself. Featuring key advantages from our popular Gen2 platform. The MCKSHIELD will come standard with a Gen2 stabilizer, an aluminum top Picatinny rail, and a magazine button catch/release for stronger retention on the extra mag holder of the MCK.

// M&P 1.0 SMITH & WESSON

SKU: MCKMPGEN1

AS SHOWN
SKU: MCKMPGEN1KR

DESCRIPTION:

The MCKMPGEN1 was released in 2019 for compatibility with the first-generation M&P 3.6" compact and the 4.25" full size. The M&P is a hybrid evolution between the Smith & Wesson Sigma and Smith & Wesson SW99 design.

// M&P 2.0 SMITH & WESSON

SKU: MCKSWMP

AS SHOWN
SKU: MCKSWMPMCB

DESCRIPTION:

Shortly after releasing a Micro Conversion Kit for the first-generation M&Ps, the 2.0 M&P MCK became available. The MCKSWMP is for the M&P 2.0 compact 3.6", compact 4" and full size 4.25" models. The M&P 2.0 was introduced in 2017 and featured an improved trigger and more aggressive texturing on the handgun's grip. The ability of the M&P series to be field stripped without depression of the trigger was one way that Smith & Wesson tried to separate themselves from Glock.

// SMITH & WESSON SD VE

SKU: MCKSWSD9

AS SHOWN
SKU: MCKSWSD9USA

DESCRIPTION:

Smith & Wesson introduced the SD9VE /SD40VE in 2012 as a Self Defense ("SD") pistol. The Value Edition ("VE") in offering consumers another option, at an excellent price point. The SD9VE /SD40VE is a full size striker fired semi-automatic pistol, with a double action safety trigger, front and rear white dot dove tail sights, lightweight polymer frame, stainless slide and barrel, and an aggressive textured grip. The MCK SD9VE /SD40VE conversion kit will feature an aluminum rail, Gen 2 Stabilizer, and a magazine button for the extra mag holder.

Made of aircraft-grade aluminum, this durable glass breaker easily attaches to the barrel shroud of the MCK and fits right in with the tactical style, cool look, and duty application design of the MCK. The MCK Glass breaker works with all MCK and MCKGEN2 models.

// ADVANCED UPGRADE KIT

PUSH BUTTON SLING SWIVEL

The Push Button Sling Swivel is constructed of steel for long lasting durability. It provides a quick release attachment for slings and will accept slings up to 1.6" without binding. The PBSS is proprietary for the MCK and attaches to the MCK underneath the rear housing.

ONE POINT SLING

The One Point Sling is ideal for CQB or for an outdoor range. The sling allows for easy movement when operating in tight spaces. The sling maintains its structure and provides comfortable carry options. It is fully adjustable to fit all body sizes. The side release buckle allows for quick release and frees up your hands. The bungee cord allows you to lengthen the sling when needed.

POLYMER FRONT & REAR SIGHTS

The MCK Front and Rear Flip-UpSights securely attach to the top of the Picatinny Rail and use a simple and quick pull-to-release system. The low-profile front sight features a quick adjust center post for elevation. It includes the standard A2 style, double peep aperture with notch sight and is click adjustable for windage. The MCK logo is embedded in both sights.

ADVANCED KIT

INTEGRAL FRONT FLASHLIGHT

An ambidextrous flashlight provides 500 Lumens of brightness to illuminate your target and your surroundings. The flashlight is removed by depressing the tabs on the side of the platform underneath the shroud and is a proprietary item. The flashlight can be rotated to place the power button in the shooter's preferred position and powered by a standard CR 123 battery (included). The flashlight has four unique functions, low lumen level, high lumen level, strobe and timer.

POLYMER THUMB RESTS

The pair of thumb rests easily attach to the side Picatinny Rails. The thumb rests prevent your support hand from moving towards the muzzle and provides isometric tension for steadier shooting. Designed for both left and right-handshooters and can be assembled on any weapon that has a side Picatinny Rail. The MCKTHR is one of the most popular add-ons to the MCK.

MADE IN USA

// MORE COOL SHIT

3IN1 FLASHLIGHT ADAPTOR

Our MCK3N1is a new modular adaptor that allows the shooter multiple options to carry our MCKFlashlight. With the MCK3N1,you are able to carry our MCKFL on a belt (OWB), or as a weapon mounted flashlight that attaches to the universal rail of your Glock, or you can quickly and easily transition the MCKFL from the adaptor to put into the front of your Micro Conversion kit, MCK.

ALUMINUM PICATINNY RAIL

TheAluminumPicatinny Rail comes standard with the MCK Gen2. The revamped Picatinny Rail increases stability, durability, and accuracy. The 12-inch military spec rail accepts backup sights and optics. It is easily installed and can be purchased as an aftermarket add-onor with any MCK. The aluminum rail allows a compensated pistol to be used inside the MCK.

SIDE MOUNT/ADAPTOR

The Side Mount Flashlight/Laser Adaptor allows MCK shooters to run both a flashlight and laser simultaneously by providing an additional mounting device on the MCK’s side picatinny rail. It features a push button operation design that requires minimal hand adjustment for easy control of the laser or flashlight while shooting the MCK. Quality hardware keeps your laser secured and on point. This Side Mount/Adaptor is designed specifically for our MCKFlashlight (MCKFL), MCKRed Laser (MCKLR) and MCK Green Laser (MCKLG).

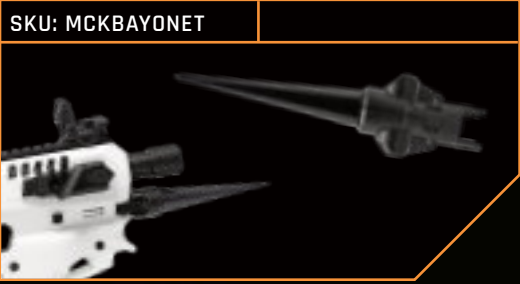

RED & GREEN LASER

The Red/Green Lasers allow the shooter to acquire a target quicklywithout using their sights. It utilizes a 123 battery (included) and fits firmly into the designated flashlight compartment of the MCK.Using the laser, you can fire from the hip as well as shooting on the move.

MICRO RED DOT (MRD)

The Micro Red dot sight is a joint venture with Crimson Trace and features 1.3years of battery life on a single CR2032battery with 14different illumination settings (7 settings for red & 7settings for green) that can be quickly cycled through for use at night or on a bright day. The 4 MOAred dot is extremely crisp and is designedto aid in rapid target acquisition in all lighting conditions. The MRDfeatures fully multi-coated glass to reduce reflection and provide a clear sight picture. It is also shock, dust, impact, fog and recoil resistant.

ALUMINUM BAYONET

The MCKBAYONETis a “Thorn” style attachment made from aircraft-grade aluminum.It is available in a 4” length with a black anodized finish. It uses the existing flashlight mount on the MCK making this a quick and easy upgrade to any MCK!

MADE IN USA

SHORT STABILIZER

Short Stabilizer Brace is designed with the intention of being secured to your arm with the velcro strap. It allows for easy mobility in close quarters and is a Non NFA item. The MCKSB can be folded for more compact carry. Exclusively licensed to CAA USA by SB Tactical, patent owner, the MCKis the only handgun conversion kit authorized to use this brace.

GEN 1 STABILIZER

The Extended Stabilizer Brace provides a more stable platform which increases your stability and accuracy and is designed with the intention of being secured to your arm with the Velcro strap. It is a Non NFA item. Exclusively licensed to CAAUSA by SB Tactical, patent owner, the MCK is the only handgun conversion kit authorized to use this brace. Comes standard with all the Gen 1MCKs.

GEN 2 STABILIZER

Constructed of high-impact polymer and TPE rubber that is lighter and more durable than conventional rubber. MCK Gen 2 can fire in the folded and locked position. Compatible with Gen 1& Gen 2 MCKs and is intended to be secured to your arm with the Velcro strap. Exclusively licensed to CAAUSA bySB Tactical, patent owner, the MCK is the only handgun conversion kit authorized to use this brace. Non NFAitem.

GEN 3 SHORT STABILIZER

TheGEN3 Short Stabilizer Brace is constructed of durable polymer with a Velcro arm strap that can be folded left or right. The compact size makes it easier to transport the MCKand to maneuver in close quarters. This brace is made for CAA USA exclusively by SB Tactical.

GEN 3 STABILIZER

The Gen 3 Stabilizer Brace is constructed of durable polymer with a Velcro arm strap. The brace can be folded left or right. The extended length provides more stability. This non-NFA brace is made by CAA USA and licensed exclusively by SB Tactical.

SKU: MCK3-CH-GEN3

GEN 3 CHARGING HANDLE

This new MCK charging handle has a unique two-piece design that consists of a precision engineered, small footprint slide cover plate and a threaded screw-in knurled charging handle that can be used on either the right or left side depending on the situation. One of the BEST aspects of the GEN 3 charger is its backwards compatibility. (Gen 1-Gen 2 MCK).

SKU: MCK-GLCH-ELITE

GEN 3 ELITE HANDLE

The new ELITE charging handle is ergonomically shaped and made entirely of steel and has an ambidextrous QD attachment. This new handle has a backplate that is compatible with all double-stack Glock handguns, regardless of caliber, as well as P80 handguns. The new ELITE handle fully backward compatible with MCKGEN1, MCKGEN2 AND MCKGEN3 models.

SKU: MCK-GLCH-PRO

GEN 3 PRO HANDLE

The new PRO charging handle is round shaped and made entirely of steel and has an ambidextrous QD attachment. This new handle has a backplate that is compatible with all double-stack Glock handguns, regardless of caliber, as well as P80 handguns. The new PRO handle is fully backward compatible with MCKGEN1, MCKGEN2 AND MCKGEN3 models.

SKU: MCKCHR

MCK CARRYING HANDLE

MCK CARRYING HANDLE is constructed of durable Aluminum. Easy to install and it's adjustable. It allows for easy transportation of the MCK. It comes with a integral rear sight as well as a pop-up front sight.

SKU: MCKHG

MCK HANDLE GRIP

The MCK HANDLEGRIP enhanced rubber grips provide outstanding grip texture especially when it counts. The grips are perfect for the MCK and aid in improved accuracy, control, and recoil management.

SKU: TAC

MCK TAC

The MCK TAC was developed for concealment and maneuverability with VIP protection in mind. The TAC features a one-point bungee style sling and Quick Detach sling swivel. The TAC's rear housing will accommodate all models of the MCK and has a small built-in storage compartment.

MADE IN USA

SKU: MCKSTK

GEN 1 NFA STOCK

The NFA stock is similar to a rifle stock. It provides a steady platform when firing the MCK. The NFA Stock is designed to be placed against the shoulder allowing for increased stability and accuracy. It requires an ATF Tax stamp on the pistol designated to the kit.

SKU: MCKGEN2STK

GEN 2 NFA STOCK

The MCKGEN2 Stock is our NFA rifle stock option that is designed for our MCKGEN2 platform only. Designed to be placed against the shoulder while firing MCKGEN2 models, provides optimum comfort and ergonomics while increasing stability and accuracy. The MCKGEN2 Stock is an NFA item that requires an ATF Tax Stamp for the designated pistol in the kit.

SKU: MCKSTKGEN3

GEN 3 NFA STOCK

The Gen 3 Stock is constructed of durable polymer and TPE rubber. The stock is to be shouldered similar to a rifle stock. The Gen 3 stock requires you to SBR your pistol with a tax stamp with ATF.

SKU: MCKCASE

MCK VIOLINCASE

The Violin case allows you to carry the MCK and accessories comfortably. Compartments are laser cut to ensure secure fit. The exterior of the case features a Velcro patch area (MCK Patch included). The case has 2 levels compartments for all your MCK accessories. Top level; MCK and Grass breaker, Bottom level; all MCK accessories and magazines.

// MORE COOL SHIT

TRAINING HANDGUN

The Training Handgun is constructed of polymer and replicates the Glock 19. The Training Handgun can be placed inside the MCK kit for display in retail stores or for safely practicing insertion /removal of the pistol from the MCK. It is also a great way to teach handgun safety. It is available in Black, Blue, Clear, Red & White.

DEMONSTRATION STAND

The Demonstration Stand is constructed of durable plastic material. Allows for a quick and seamless way to present the MCK on a store counter. The demonstration stand can also accommodate the CAA Training Handgun.

BELT HOLSTER FOR MCK

The Belt Holster is designed exclusively for carrying the Micro Conversion Kit (MCK). Built to fit all belt sizes and locks quickly in place. The holster is angled to allow for a quick and easy draw.

Includes: Picatinny Rail attachment, Belt Holster and Allen key. Right-handed only.

UNIVERSAL GLOCK HOLSTER

Universal Glock Holster is an IWB holster including a belt clip at a 12-degree angle. Made from the same material as the Glock pistols. Compatible with all generations of Glock (17,19,19x,22,23, 25,31,32, 34,35,&45). With no moving parts, positive passive retention technology, and three internal leaf springs, maintaining internal weapon contact. Available in Black, OD Green, FDE, Tungsten & White.

EXTENDED MAGAZINE

The Glock extended magazine for Glock 9mm and Glock 40 pistols have a capacity of 33-rounds. The Glock extended magazine for Glock .45 Auto pistols has a capacity of 26-rounds. The magazine features an all-black polymer construction and works with Glock pistols (Gen 3 or later) and Glock-compatible carbines and AR Platforms.

MADE IN USA

GLOCK DRUM MAGAZINE

The Drum Magazine is available for Glock handguns (Gen 3,4,5) in four calibers (9mm/50 rounds, .40/50 rounds, 10mm/40 rounds and .45/40 rounds). The drum magazine also works with Glock magazine compatible carbines and AR platforms. Features include heat treated internal chrome silicon wire spring for maximum reliability and smooth feeding, and special finger taps for quick and easy reloading.

BRASS CATCHER

The MCK Brass Catcher is made for those that reload and for keeping the range clean. It connects with a screw on one side and a magnet on the other. It has a Velcro release at the bottom that easily allows the shooter to empty the casings.

BALLISTIC SLING BAG

Built especially for the Micro Conversion Kit (MCK) and MCK accessories. The Ballistic Sling Bag features a HK snap sewn directly to the top of the bag, which allows the MCK to be attached and deployed from the bag, quickly and smoothly. The zipper pocket on the rear of the sling bag will accommodate a 10x12 Ballistic Plate.

Comes with or without the CAA USA logo.

MEASUREMENTS:

Length: 17in.
Width: 13in.
Depth: 3 in.

KNIFE

The patent-pending MCK Knife is a 3" 7CR17MOV Steel Blade with a four-inch grip that attaches securely into the MCK spare magazine holder. Includes MCK to Knife Grip Adapter, Adapter Removal Tool & Knife Holster. The adapter can be removed when not in use to allow for spare magazine placement.
