# X-CALIBUR MATCH

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Triger pull weight:	15-18 N/30-35 N
Overall lenght:	220 mm
Height without magazine:	144 mm
Width:	48 mm
Barrel lenght:	127 mm
Weight w/o magazine:	872 g
Weight w empty magazine:	885 g
Standard magazine capacity:	15

The X-Calibur is our well known, out of the box competition ready, flagship. We offer two new modifications to further accommodate to needs of our customers, who asked for heavier version as well as for option to mount a red dot sight, in order to allow them to use their favourite X-Calibur for more and more disciplines in shooting sport.

There are two new options available – Match and Match CO, standing for Carry Optics. They both possess additional weight of 350g in form of massive steel dust cover, including standard picatinny rail for any accessories shooter may want to attach to his X-Calibur. Additionally, the CO version slide is milled to accept mount base for red dot sight. The red dot mount base can be replaced by micrometric rear sight if needed. Additional weight on the front further reduces muzzle flip and recoil, making accurate follow-up shots significantly easier. Of course, the main feature of every X-Calibur, rotational barrel is present also on both Match and Match CO variants. Our X-Caliburs are equipped with clean, crisp trigger with short reset. SA/DA operation fits most shooting disciplines.

## X-CALIBUR MATCH

# X-CALIBUR

The X-calibur, being our flagship model, is ready for competition out of the box. Aggressive slide milling reduces weight of the slide and can be used for press checks. Milling also reveals heavy, fluted barrel offering attractive, yet functional design and compliments X-caliburs exceptional shooting performance. Fiber optic front sight combined with micrometric rear sight allow for fast sight acquisition and precise adjustment. We consider crisp trigger with short reset a standard on all of our pistols, however these are further enhanced for our X-calibur, giving you the best tool for your sport shooting.

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Triger pull weight:	15-18 N/30-35 N
Overall lenght:	220 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel lenght:	126,7 mm
Weight w/o magazine:	797 g
Weight w empty magazine:	885 g
Standard magazine capacity:	15

# X-CALIBUR

# K100 & P1 & P11

## K100

K100, our core model, with SA/DA trigger mechanism and rotational barrel is a result of incorporating the most strict requirements imposed on universal guns with ergonomics suitable for shooters of practical disciplines as well as for special units of LE/military forces. Dust cover is fitted with universal tactical accessory rail. Mk12 frame offers four interchangeable backstraps.

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	202,5 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	108 mm
Weight w/o magazine:	740 g
Weight w empty magazine:	820 g
Standard magazine capacity:	15

## P1

P1 is compact version of the K100, offering the same reliability, ergonomics and benefits of rotational barrel design in shorter package, more suitable for every day carry. P1 also maintains the same Mk12 grip and 15+1 magazine capacity as the K100 and offers similar shooting experience and accuracy. Despite its shorter size, the P1 can compete with much larger pistols with ease.

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	187,5 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	93 mm
Weight w/o magazine:	690 g
Weight w empty magazine:	770 g
Standard magazine capacity:	15

## P11

P11, our sub-compact 9mm pistols, maintains fully ambidextrous operation, rotational barrel design and robust, reliable construction, materials and craftsmanship than its bigger brothers, while concealability is increased by shortening of the barrel and slide, as well as accommodating shorter and narrower grip.

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	179 mm
Height without magazine:	118 mm
Width:	36 mm
Barrel length:	85 mm
Weight w/o magazine:	640 g
Weight w empty magazine:	737 g
Standard magazine capacity:	12

# Q100 & Q1 & Q1S

The Q100 brings striker fire to GRAND POWER production line. Bearing all advantages of our famous K100 service pistols, the Q100 offers the same rotational barrel reducing perceived recoil and muzzle flip, provides fully ambidextrous controls, Mk 12 frame with four interchangeable backstraps, 15 magazine capacity, tools free field strip and adds up flat profile trigger with smooth and consistent trigger pull for accurate, repeatable shots. In addition to safety mechanisms known from K100, trigger safety is present on striker fire pistols to ensure safe operation.

Caliber:	9 mm Luger
Trigger mechanism:	N / A
Triger pull weight:	16 N
Overall lenght:	202 mm
Height without magazine:	133 mm
Width:	34 mm
Barrel lenght:	108 mm
Weight w/o magazine:	760 g
Standard magazine capacity:	15

The Q1, compact version of the Q100, shares many of benefits of its bigger brother in shorter, easy to conceal and carry form. Fully ambidextrous controls, four interchangeable backstraps as well as 15+1 magazine capacity are maintained, while difference in accuracy and overall performance of the pistols is virtually negligible.

Caliber:	9 mm Luger
Trigger mechanism:	N / A
Triger pull weight:	16 N
Overall lenght:	187 mm
Height without magazine:	133 mm
Width:	34 mm
Barrel lenght:	96 mm
Weight w/o magazine:	680 g
Standard magazine capacity:	15

For everyday carry and better concealability, the Q1S combines shorter, smaller frame you may find on our P11 with slide and barrel of the Q1, offering great concealability yet still offering excellent 12+1 magazine capacity, as well as maintaining benefits of rotational barrel and flat profile trigger of the Q1.

Caliber:	9 mm Luger
Trigger mechanism:	N / A
Triger pull weight:	16 N
Overall lenght:	183 mm
Height without magazine:	119 mm
Width:	34 mm
Barrel lenght:	93 mm
Weight w/o magazine:	650 g
Standard magazine capacity:	12

# K22 & CP22

## K22

Caliber:	.22LR
Trigger mechanism:	SA / DA
Triger pull weight:	20-25 N/35-40 N
Overall lenght:	211,5 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel lenght:	127 mm
Weight w/o magazine:	670 g
Weight w empty magazine:	720 g
Standard magazine capacity:	10

The K22 is a semi-automatic pistol chambered in affordable .22LR caliber, offering solid steel frame, slide and bull barrel for long and reliable service. Grip, including 4 interchangeable backstraps, fully ambidextrous controls, sights and accessory options are shared with our 9mm pistols for easy adaptation as a training tool that allows shooter to train more for less.

## CP22

Caliber:	.22LR
Trigger mechanism:	SA / DA
Triger pull weight:	20-25N / 35-40 N
Overall lenght:	173 mm
Height without magazine:	131 mm
Width:	36 mm
Barrel lenght:	94 mm
Weight w/o magazine:	595 g
Standard magazine capacity:	10

Built to very same standards and from same materials as all of our rimfire pistols, CP22 is the most compact .22LR pistol in our portfolio. Built on P11 size polymer grip, we managed to maintain fully ambidextrous controls and steel slide, frame as well as threaded bull barrel equipped with knurled thread protector. Despite its small size, you will get robust and reliable pistol in affordable caliber.

# K22 TS

The K22 TS, TS standing for Target Sport, is our answer to suggestions of long range rimfire shooters, however, we managed to maintain other benefits of GRAND POWER rimfire pistol as well.

The K22 TS is manufactured in three barrel length variants, 5", 6" and 8" in order to accommodate to shooters needs as well as local legislation. Long barrel provides for excellent accuracy and we accompanied it with fully adjustable micrometric type rear sight as well as fibre optic front sight. The barrel is threaded for accessories. Thread protector is included as standard.

Our crisp SA/DA trigger is famous for short reset and further enhances accuracy of follow-up shots.

Unique slide design makes it light, despite the fact that it is made from a single piece of steel, unlike many rimfire handguns, providing great reliability as well as long life. Generous chamber access space allows easy manipulation, for example in case of ammo malfunction. To further increase durability of K22 TS, it is built from same parts as our larger caliber pistols, such as steel insert and Mk12 polymer frame. For owners of other GRAND POWER pistols, full size controls with identical layout will be beneficial, making the K22 TS also great training tool. The K22 TS can also be fitted with many parts used to customize your larger caliber GRAND POWER pistols. Accessory rail is also present for your light, laser or other accessories. Interchangeable backstrap covers lanyard hole. Enlarged sport safety levers provide rest for your thumb and can be replaced by lower profile ones.

Caliber:	.22LR
Trigger mechanism:	SA / DA
Triger pull weight:	N / A
Overall length:	237,5 mm (6" version)
Height without magazine:	144 mm
Width:	36 mm
Barrel lenght:	5" / 6" / 8" mm
Weight w/o magazine:	712 g
Standard magazine capacity:	10

# P40 & P40L 10MM AUTO

## P40

Caliber:	10 mm AUTO
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	206,5 mm
Height without magazine:	135,5 mm
Width:	36 mm
Barrel length:	108 mm
Weight w/o magazine:	770 g
Weight w empty magazine:	880 g
Standard magazine capacity:	14

The P40 offers a unique rotational barrel mechanism to those who prefer shooting with powerful 10mm AUTO rounds. Built on the latest generation ergonomic polyamide handle, more robust than standard Mk 12 grip, robust to withstand regular use of 10mm ammunition. The new rounded slide profile provides excellent handling and ergonomics.

## P40L 10MM AUTO

Caliber:	10 mm AUTO
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	228 mm
Height without magazine:	136 mm
Width:	36 mm
Barrel length:	127 mm
Weight w/o magazine:	875 g
Weight w empty magazine:	972 g
Standard magazine capacity:	14

Longer P40 L model provides even more accurate shooting and increased mass shifts centre of gravity towards muzzle to further reduce muzzle lift, which makes shooting 10mm an enjoyable experience.

# P380, CP380 & LP380

## GEN 2

### P380

The P380 is a self-loading pistol chambered in .380 ACP caliber with SA/DA trigger mechanism, designed mainly for security services and personal protection, especially in jurisdictions that prohibit possession of larger caliber firearms. Robust barrel and steel frame insert provide long service life. Pistol is operated by direct blowback. P380 features fully ambidextrous controls and interchangeable backstraps in four sizes.

Caliber:	.380 ACP
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	189 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	105 mm
Weight w/o magazine:	720 g
Weight w empty magazine:	780 g
Standard magazine capacity:	15

### CP380

CP380 is a sub-compact version of our P380, designed mainly for personal protection. CP380 is lightweight, reliable and accurate pistol ideal for everyday carry.

Caliber:	.380 ACP
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	179 mm
Height without magazine:	118 mm
Width:	36 mm
Barrel length:	85 mm
Weight w/o magazine:	640 g
Weight w empty magazine:	737 g
Standard magazine capacity:	12

### LP380

LP380, .380 caliber, is a standard size pistol offering superior feel and performance to every user. No matter if carried on duty, for personal protection or to compete, this model offers reliability, accuracy and top quality.

Caliber:	.380 ACP
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	216 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	135 mm
Weight w/o magazine:	791 g
Weight w empty magazine:	886 g
Standard magazine capacity:	15
