PRODUCT CATALOGUE

About us

With 30 years of experience in production of firearms, HS has grown into one of the leading manufacturers of top-quality small arms with one of the largest production factories in the world.

Ever since its foundation, advanced thinking has been the focus of HS manufacturing which was the main factor for the international success of the HS pistol line, developed using latest technological achievements and real combat experience from the Croatian Homeland War.

Following HS pistol line's success, surge of demand for HS products enabled the company to make significant investments in manufacturing facilities, equipment and engineer workforce, making HS one of the manufacturing leaders on the international market.

HS today takes pride in its reputation for delivering innovative, high-performance quality firearms with strong focus on development of technologically advanced and reliable products.

Every HS product is developed using years of expertise, ensuring that the final products reflect our commitment to excellence and safety.

This is recognised by both experts and end-users who repeatedly award our top-class handguns.

HS-9 3.0 G2

HS-9 G2 3.0 has everything you need in small, sub-compact package. Featuring hammer forged 3 inch barrel and forged steel slide protected with Melonite finish. Redesign frame contour and grip texture allows higher gripping on the gun resulting in better control during rapid fire. Slide has deeper serrations for easier manipulation especially under stress. Pistol is equipped with fiber optic front sight and low profile rear sight. The sights are serrated to prevent the glare. Other features are picatinny rail, ambidextrous magazine release, grip safety, trigger safety, firing pin safety along with striker-status indicator and loaded chamber indicator. Trigger guard is enlarged for easier trigger manipulation even while wearing gloves. Pistol comes with two types of stainless steel magazines – one is flush with the grip and capacity of 13+1, the other is full-size magazine with grip sleeve and capacity of 16+1. This means that by simply changing the magazine we can transform HS-9 G2 3.0 from concealed carry/back-up option to high capacity full-frame pistol. All these features make HS-9 G2 3.0 extremely versatile weapon.

HS-9 5.0 G2

HS-9 G2 5.0 offers everything you need for duty-carry, home-defense or even competition. Featuring 5 inch hammer forged barrel with longer slide and full size frame. The longer barrel translate in to muzzle velocity increase, but it also adds more weight up front, which helps reduce muzzle flip and felt recoil, allowing faster follow-up shots. Increased sight radius in combination with fiber optic front sight and low profile rear sight enables faster target acquisition. The sights are serrated to prevent the glare. Redesign frame contours with new grip texture allows higher hand positioning on the gun and better control during rapid fire. Trigger guard is enlarged for easier trigger manipulation while wearing gloves. Other features include picatinny rail, ambidextrous magazine release, grip safety, trigger safety, firing pin safety along with striker-status indicator and loaded chamber indicator. Pistol comes with stainless steel (16+1) magazines.

VHS2S SEMI-AUTO

VHS-2S is a fully ambidextrous semi-automatic rifle. Designed on bullpup modular platform with proved short-stroke gas piston operating system it maintains all the ballistic benefits of a longer barrel in a shorter package without sacrificing overall length, accuracy and muzzle velocity. Adjustable gas block works in two modes; suppressed and unsuppressed. The polymer receiver is equipped with an 5 point adjustable buttstock. The rifle is equipped with NATO STANAG 4694 rail and adjustable flip up iron sights. Front handguard has M-LOK mounting system at the 3, 6, and 9 o'clock positions. Pistol grip is removable and compatible with M4/AR-15 style grips. Rifle is equipped with ambidextrous dual system of sling attachment; QD socket on front handguard, upper receiver and buttstock with eyelet attachment for sling snap hook on upper receiver and on the buttstock.

VHS-2S is compatible with STANAG 4179 magazines.

Combination of all of this with dual dust cover ejection ports on both sides of the receiver and specially designed empty case defectors create flexible and user friendly multi-purpose rifle.

Advantages/key features

- Long barrel compared to total length of the rifle (60% of the total length of the rifle is barrel length)
- Barrel thread 1/2" -28 compatible with all M4/AR-15 flash suppressor devices
- Removable pistol grip, compatible with all M4/AR-15 pistol grips
- Trigger shape - straight
- M-LOK mounting system on front handguard on 3 positions: 3 o'clock, 6 o'clock and 9 o'clock
- Ambidextrous dual system of sling attachment: QD socket on front handguard, upper receiver and on the buttstock
- Eyelet attachment for sling snap hook on upper receiver and on the buttstock
- Long NATO 4694 rail on the upper receiver
- Front mechanical sight: Integrated into NATO 4694 rail on upper receiver, flip-up, elevation adjustable
- Rear mechanical sight: Integrated into NATO 4694 rail on upper receiver, flip-up, windage adjustable, 5-position aperture
- Mechanical sights are user adjustable without tools
- Adjustable gas cylinder: "N" for normal mode and "S" for suppressor mode
- Adjustable buttstock in 5 positions
- Ambidextrous fire selector
- Ambidextrous cocking handle, not reciprocating
- Ambidextrous bolt release
- Ambidextrous magazine release
- Ambidextrous buttstock adjustment lever
- Ambidextrous cartridge ejection port (ejection side can be switched without additional parts and tools on user level)
- Low recoil force - center of mass is in the middle of the rifle
- Captive takedown pins
- High quality impact resistant glass reinforced polymer
- Easy disassembly and maintenance

VHS-2

VHS-2 is a fully ambidextrous 5.56 NATO caliber assault rifle. Designed on bullpup modular platform it maintain all the ballistic benefits of a longer barrel in a shorter package without sacrificing overall length, accuracy and muzzle velocity. The polymer receiver is equipped with an 5 point adjustable buttstock. Combination of all of this with dual dust cover ejection ports on both sides of the receiver and specially designed empty case defectors create flexible and user friendly multi-purpose rifle. The rifle is equipped either with an carrying handle with NATO STANAG 4694 rail and flip up iron sights or with integrated 1.5X optical red dot sight. Front handguard has NATO STANAG 4694 rails at the 3, 6, and 9 o'clock positions with removable rail covers so the rifle can accept extra accessories. Magazines are made of durable polymer with semi transparent pattern and 30 rounds capacity allowing the operator to quickly view the ammunition count without removing the magazine. VHS-2 uses proved short-stroke gas piston operating system with rotating bolt. The rifle can fit VHS-BG 40 mm single shot grenade launcher under the barrel. VHS-2 is coming in two different versions: VHS-2D 500 mm barrel length designated marksman version with effective range up to 800 m and VHS-2K 410 mm barrel length standard base version.

Caliber (mm)	5.56×45	5.56×45
Ammunition (mm)	5,56×45; SS109	5,56×45; SS109
Barrel length (mm)	500	500
Length (overall) (mm)	800	800
Length (drawn out buttstock) (mm)	850	850
Width (mm)	76	76
Height with NATO frame (mm)	205	250
Height with magazine (30 rd) (mm)	269	313
Weight without magazine (kg)	3,85	4,15
Weight of magazine (empty) (g)	134	134

Advantages/key features

- compact size/short overall length
- accuracy
- ballistic benefits
- modularity
- true ambidextrality
- maneuverability
- highest operational versatility
- easy to operate in confined spaces
- easy maintenance
- no external moving parts on the weapon during firing (non reciprocating charging handle doesn't move and can't potentially hit users hands, face or hit structures and other objects during shooting in confined spaces such as vehicles, etc.)
- changing position of the ejection port without using special tools or spare parts
- left handed shooters can shot with the right positioned ejection port or vice versa
- options between flat or magazine with coupling attachment points

VHS-BG

The VHS-BG is double action single-shot 40×46 mm grenade launcher. Equipped with hammer forged barrel and high durable polymer, VHS-BG can fire all 40x46mm type of grenades on the market – smoke, HE, CS, Rubber, etc.

VHS-BG can be used as stand alone variant or as under-barrel grenade launcher for VHS-2 rifle. Mounting grenade launcher on VHS-2 rifle is easy and fast with our one pin quick-mount system.

VHS-BG has mechanical sight attached to the side of the launcher, either on the left or right depending of the users needs. It is also equipped with MIL-STD rail for mounting different sights options. With retractable stock, we can optimize overall lenght depending of the mission require ments.

Low recoil, light and compact, VHS-BG is ideal for different tasks.
