The Prizefighter signature cut creates a distinct look with its aggressively styled windows. The lightened slide improves performance by decreasing reciprocating mass, therefore reducing muzzle flip and felt recoil to get you back on target for faster follow up shots. This model is best suited for range and competition use.

All ZEV Gun Mods include the following components:

G19	1.0"	.84"	6.75"	11.3 oz.
G17	1.0"	.84"	7.25"	11.4 oz.

This visually stylish slide combines some of the best and most requested features from our other slides into one.

Its angled front and rear serrations offer plenty of grip without getting hung up on your holster, while the small top serrations help to reduce glare. The window cuts on the top edge of the slide finish out the highly customized look.

GLOCK 19

GLOCK 17

All ZEV Slide Kits include the following components:

- Stripped ZEV Slide..... Cut and Colors Vary
- Co-Witness Sight Set SIGHT.SET-300-CW-B-CW-B
- RMR adapter plate ADAP-RMR-SS-45-BLNK-SM

ZEV Slide Specifications:

Model	Width	Height	Length	Weight
G19	1.0"	.84"	6.75"	10.5 oz.
G17	1.0"	.84"	7.25"	11.0 oz.
G34	1.0"	.84"	8.0"	11.5 oz.

The Dragonfly signature cut was one of our first designs and remains our most popular model. The lightened slide improves performance by decreasing reciprocating mass, therefore reducing muzzle flip and felt recoil to get you back on target for faster follow up shots. This model is best suited for range and competition use.

All ZEV Slide Kits include the following components:

- Stripped ZEV Slide..... Cut and Colors Vary
- Co-Witness Sight Set SIGHT.SET-300-CW-B-CW-B
- RMR adapter plate ADAP-RMR-SS-45-BLKN-SM
- Stainless Steel Firing Pin Safety FPS-SS-SM
- Firing Pin Safety Spring SPR-FPS
- Skeletonized Striker..... STK-SM
- Striker Spring (3lb)..... SPR-STK-3LB
- Aluminum Back Plate BK.PLATE-AL

ZEV Slides features:

- Machined from 17-4 Stainless steel billet
- Lowered ejection port to aid in ejection of brass
- Match grade, precision milled tolerances that are tighter than factory
- Improved accuracy and grouping performance upon installation
- DLC or PVD coatings offered have a Rockwell hardness rating above that of factory coatings

ZEV Slide Specifications:

Model	Width	Height	Length	Weight
G19	1.0"	.84"	6.75"	11.5 oz.
G17	1.0"	.84"	7.25"	11.7 oz.

The Hex signature cut was designed with stylish yet functional serrations to ensure positive traction when manipulating the slide. This model is equally suitable for carry, range, or competition use.

ZEV Technologies and CGS Suppressors LLC teamed up to design and produce the lightest, quietest, and most versatile 9mm handgun suppressor currently available. This silencer has a shielded baffle stack comprised of 7075 T6 Aluminum that has been Type III Hard Anodized to Military Specifications.

FEATURES:

- Capable of metering 114db in accordance with MIL-STD-1474D when mounted on a ZEV G17 host shooting Freedom Munitions 165gr Hush ammunition
- Utilizes second generation Orion baffles for the best sound reduction available
- Uses special cut pistons to limit first round pop
- An industry leading 12 piston engagement points allows users to easily adjust for point of impact shift on different host firearms
- The baffles and the shroud shield the tube from carbon and debris.
- ½x28 threading for compatibility with ZEV match grade threaded barrels
- Easy to remove baffles for quick user serviceability

MATERIALS:

Tube6061 T6 Aluminum
Blast Baffle.....17-4 Stainless Steel

ZEV// MATCH GRADE BARRELS

ZEV Technologies Match grade drop-in barrels feature extremely tight tolerances and are manufactured with pre-hardened chromium stainless steel (416R) that was originally designed for use in match grade rifle barrels. This material provides high tensile strength and toughness to withstand typical chamber pressures, while being highly corrosion resistant.

ZEV Match grade barrel bores are some of the most precise in the industry. Every barrel is double honed (rough and finish) until a minimum surface finish of 16 RA is reached. During this process, the barrels are held to a final dimension of $\pm 0.003"$ for consistency and accuracy.

The barrels are cut rifled and 100% inspected for groove dimensions and broach finish. Threaded version available.

BARREL SPECS:

- 416R Rifle Barrel Quality Stainless Steel
- Match grade drop in barrel
- Final dimension of $\pm 0.003"$ for consistency and accuracy
- SAAMI spec. Match chambers
- Rifled with a 1 in 10" twist rate

ZEV// PRO PLUS MAGWELL

ZEV Technologies PRO Plus Magwell was designed for the professional shooter that is looking for a larger opening than our standard PRO version. It also incorporates a pass-through hole at the back for lanyard retention.

Designed to fit both Gen-3 and Gen-4 GLOCK frames.

- One piece aluminum design
- Smooth black anodized finish
- Kit includes magwell body, mounting screw, and wrench.

NOTE:

- Gen-4 back straps may need to be modified if used.
- 10 Round magazines WILL NOT work with this model of magwell. If 10 round capacity magazines are primarily used, this product is not recommended.

ZEV// GLOCK BASEPADS

Building on the success of ZEV Technologies magazine basepad extension for the MAGPUL PMAG® 17 GL9™, ZEV Technologies has developed an innovative three piece design basepad for factory GLOCK magazines.

Featuring a customized baseplate and integrated sliding lock mechanism, this magazine basepad extension allows the user to disassemble and reassemble the magazine for cleaning without the use of tools.

- Adds +5 capacity on 9mm
- Adds +4 capacity on .40 cal
- Fits standard capacity GLOCK 9mm & .40 magazines
- Additional power spring provided
- Available in Red and Black anodized aluminum

NOTE:
GLOCK magazine not included.
Not compatible with restricted capacity GLOCK magazines.

ZEV// MAGPUL BASEPADS

Following the 2016 release of MAGPUL's all-polymer PMAG® 17 GL9™ magazine, ZEV immediately went to work designing what we believe to be the definitive extended capacity basepad option for the magazine.

Simply remove the existing PMAG floor-plate, attach the ZEV Basepad and reassemble using the same floor-plate.

- Adds +5 capacity on 9mm
- Two piece design for ease of disassembly and reassembly
- Additional power spring provided
- Available in Red and Black anodized aluminum

NOTE:
PMAG not included.
PMAG floor plate not included.

COLOR	SKU

Compatible ONLY with MAGPUL PMAG® 17 GL9™ magazine (not included).

Install using the same easily removable floor-plate that comes with the PMAG.

Additional power spring included.

The ZEV Technologies AR15 Billet Receiver Set was designed to complement the enhanced features of the ZEV rifle product line while retaining compatibility with most mil-spec accessories to give you the most options for completing your build.

All receivers are precision-machined from solid billet aluminum and are held to extremely tight tolerances and high quality standards to ensure consistent fit and function. With its ambidextrous features, light weight, and superior finish, the ZEV Billet Receiver Set is the perfect foundation for any rifle build.

ZEV Billet Receiver Set features:

- Machined from American-made 7075-T651 billet aluminum
- True black Type III Class 2 hard coat anodize
- Laser T marked Picatinny rail
- M4 feed ramps cut standard
- Integrated and enlarged trigger guard
- Generous flare-cut magazine well to facilitate quick magazine insertion
- Ambidextrous bolt release
- Ambidextrous magazine release
- Threaded bolt catch for ease of assembly and disassembly compared to traditional roll pins
- Enhanced charging handle latch locking point prevents wear to the upper receiver
- Compatible for use with the unique ZEV Slide Lock ambidextrous charging handle (sold separately)
- Compatible with the ZEV Wedge Lock hand guard integral anti-rotation pin for consistent alignment of the top rail (sold separately)
- All proprietary components are included

MODEL	WEIGHT	SKU
ZEV FORGED UPPER	7.2 oz.	UR-556-FOR

The most technologically advanced hand guard on the market today. The ZEV Technologies Wedge Lock Hand Guard attaches to the receiver via an innovative system built around a lightweight Titanium barrel nut (included) and the two-piece Wedge Lock system that tightens down securely with only one screw.

Machined from aircraft grade aluminum to keep the wall thickness thin, but still strong enough for any environment.

The narrow cross-section of the hand guard provides for an excellent ergonomic grip while the M-LOK negative space mounting system provides a smooth, hand-friendly surface in place of Picatinny rails.

ZEV Wedge Lock hand guard features:

- Black type III hard anodized aluminum hand guard
- Black Nitride coated wedge system
- One piece free float design with continuous top rail
- Compatible with all mil-spec upper receivers
- Compatible with low profile gas blocks
- Integral anti-rotation pin compatible with ZEV billet upper ensures consistent alignment of the top rail
- Titanium barrel nut reduces weight and aids in heat dissipation
- M-LOK compatible accessory mounting points for user customization
- Internal diameter of 1.225"

NOTE:
The ZEV Wedge Lock is not designed for a suppressor to be mounted under the hand guard.

US PATENT 9,335,117

Includes:

- Wedge System
- Titanium Barrel Nut
- Assembly Tools

ZEV// SLIDE LOCK CHARGING HANDLE

AR-15, LARGE FRAME

The ZEV Technologies Slide Lock Charging Handle is a unique design that features smooth ambidextrous operation with fewer moving parts than any other charging handle on the market. Machined from a single piece of 7075-T6 billet aluminum for strength and durability.

Features:

- Fully ambidextrous
- Extended and textured handle for superior grip and ergonomics
- Machined from American-made 7075-T6 billet aluminum
- True black Type III Class 2 hard coat anodize
- Black nitride steel capture latch

NOTE:

Designed exclusively for use with ZEV billet upper receivers, not recommended for use with forged upper receivers.

MODEL	WEIGHT	SKU
AR-15 CHARGING HANDLE	1.3 oz.	CH-556-AMB
LARGE FRAME CHARGING HANDLE	1.4 oz.	CH-308-AMB

Does not require a latch to be pulled to release charging handle.
