

In terms of its performance characteristics, the carbine/sub-machine gun VSK-100 significantly exceeds such widely known original models as AK-47 and AKM.

In particular, the carbine/sub-machine gun has significantly improved accuracy (when shooting in short bursts) and density of fire.

CARBINE/SUB-MACHINE GUN

VSK-100

Picatinny rail allows installing collimator, optical and optoelectronic sights of Belarusian and foreign manufacturers on the carbine/sub-machine gun VSK-100.

	Weight	Fire rate	Muzzle velocity
VSK-100 + Picatinny rail  420 mm 940 mm	4.2 kg	900 rnd/min	775 m/s
AK-47  415 mm 870 mm	4.3 kg	600 rnd/min	710 m/s
AKM  415 mm 880 mm	3.1 kg	600 rnd/min	715 m/s

Caliber: 7.62 mm
