

Light MachineGun M77

Light machine gun M77 functions on the Kalashnikov principle.

It has an efficient and reliable locking system, with safety system that prevents firing before the weapon is fully locked. The reliability of functioning in various environments was confirmed in many years of exploit.

Long service life and exceptional precision are achieved with cold forged barrel.

Fluted barrel is cooled quicker, thus ensuring precision of the weapon even in heavy duty.

Goods solution for its ergonomics and excellent balance result in mild recoil.

Ambidextrous fire selector lever has three positions: single shot, burst, safe.

Gas flow regulator ensures that the weapon can be used in extreme environments and it also can be used when it is very dirty. Built-in bipod, which can be folded, facilitates aiming and firing during burst fire.

Iron sights with tritium tubes provide the possibility of aiming in conditions of low visibility.

Handguards and stock are made of quality beech.

The weapon is fed from a magazine with the capacity of 20 rounds, which is the same for all automatic weapons in cal. 7.62 x 51 mm produced in Zastava Arms.
