

V-AR 7.62x51mm & 5.56x45mm

The **V-AR 7.62x51mm NATO** semi-automatic, self-loading weapon has the perfect ergonomics and controls of AR15-type weapons, but it is equipped with a piston mechanism with automatic pressure regulation, thanks to which there is no contamination and heating of the shutter mechanism and the internal spaces of the frame, and therefore this system is almost maintenance-free. Furthermore, the system guarantees reliability and simplicity of the internal layout.

The **V-AR 5,56x45 NATO** semi-automatic weapon have perfect ergonomics and controls of the AR15 type. There we offer two variants, gas and piston, with standard or stainless steel Lothar Walther barrel. The weapon is also produced in a "left-handed" version – the ejection of the cartridge is mirror reversed, i.e. on the left side.
