ARMY**

GUNS & AMMUNITION

PROTECT YOUR WORLD

EXCALIBUR ARMY is a premier provider of a diverse range of weaponry and ammunition tailored for various applications, including vehicle-mounted, watercraft, portable, and handheld use. We are dedicated to delivering top-tier, dependable arms to meet the evolving needs of our clients.

Our extensive arsenal includes a variety of cutting-edge weaponry designed for exceptional performance, such as main battle tank guns, versatile machine guns, mortars, advanced grenade launchers, rifles, and reliable handguns. We take immense pride in our commitment to quality, ensuring that each weapon we offer is crafted to the highest standards of excellence.

In addition to our comprehensive weapon selection, our ammunition supply is equally impressive, encompassing a wide spectrum of cartridges ranging from 5.56mm to 155mm calibres. We also provide an assortment of specialized ammunition, including grenades and mortar mines. Our dedication to quality extends to our ammunition, as we strive to guarantee the utmost reliability and effectiveness in every round we produce.

NATO CALIBER WEAPONS

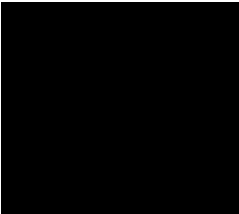

EXCALIBUR ARMY is proud to offer a wide range of NATO calibre weapons which are highly regarded for their compatibility with NATO standard ammunition and their widespread use by military forces and law enforcement agencies worldwide.

PZD 5.56 mm

LIGHT MACHINE GUN

The PZD 5.56 light machine gun is a fully automatic weapon providing critical fire support. Carried and operated by a single operator, it can be mounted on mil-spec cradles when required to perform a limited range of tasks as a universal machine gun. The weapon fires from the open bolt position, the breech is locked by a rotating bolt and unlocked by a screw slide, the slide is moved backwards by the action of the piston carrier, which is pushed by the burnt gases.

M2

HEAVY MACHINE GUN

One of the most battle-proven heavy machine guns in the world. A .50 calibre heavy machine gun inspired by the famous Browning M2. The M2 QCB (Quick Change Barrel) is the latest addition. The M2 incorporates many improvements over this venerable 12.7 mm (.50 cal) heavy machine gun, which has been widely used on armoured and light vehicles, shipborne mounts and by infantry on tripod mounts in anti-material, anti-vehicle and anti-personnel roles.

Our solution presents the world's most durable and lowest dispersion M2 QCB 12.7 mm (.50 cal.) heavy machine gun with +25,000 rounds barrel life and less than 6 MOA dispersion.

EASY OPERATION

QCB – Quick Change Barrel
Capable of right-hand or left-hand feed

LONG LIFE

Made of high quality steel
Marine grade anti-corrosion coating
Stellite lined barrel life 25,000+
Reciever life 100,000+

GENERAL FEATURES

PARAMETERS M2	
caliber	12×7 mm (.50 cal)
type of ammunition to be used	12.7×99 Standard Ammunition / Standard NATO Cartridges
weight of complete gun (without feed chutes and tripod adaptor)	38.5 kg
weight of barrel assembly	12 kg
length of gun	1,655 mm
length of barrel assembly	1,143 mm
method of operation	short recoil
firing mode	automatic Dual Selective (Single and Automatic)
muzzle velocity	900 m/s
rate of fire	450-650 rpm
max. effective range	1,830 m
max. range	6,800 m
barrel life	25,000 rounds
accuracy	18 cm (∞ 6 MOA) / at 100 m
recoil force	150-250 pounds

SR 12.7 × 99 mm

ANTI-MATERIAL SNIPER RIFLE

SR 12.7×99 mm (.50 Cal) anti-material sniper rifle is a semi-automatic weapon providing high accuracy and penetration when shotgunning at long-range targets (up to 2,000 m) as well as standard distances. The rifle is equipped with a MIL-STD-1913 rail for mounting an optical scope or night vision device.

KA-17 S

STANDARD ACCESSORIES

Every KA model comes with basic accessories.

HEAVY CALIBER MACHINE GUNS

Heavy caliber machine guns refer to firearms that utilize larger ammunition, typically .50 caliber (12.7 mm) or higher. These weapons are characterized by their robustness, high power and ability to deliver substantial damage to both personnel and armored targets. They're employed for anti-personnel, antimaterial and vehicle-mounted applications, known for their extended range, high rate of fire and the capability to penetrate armor. Often requiring mounting or stabilization due to their size and recoil, these guns are utilized in military, law enforcement, and sometimes civilian settings for specific purposes where significant firepower and penetration are necessary.

PARAMETERS	DShK	NSVT	KPVT
calibre	12.7 x 108 mm	12.7 x 108 mm	14.5 x 114 mm
gun length	1,625 mm	1,560 mm	1,980 mm
rate of fire - maximum	600 rpm	700-800 rpm	600 rpm
muzzle velocity	850 m/s	845 m/s	1,005 m/s
effective range against ground targets	6,500 m	6,000 m	7,000 m
maximum range	2,000 m	2,000 m	3,000 m
weight	34 kg	25 kg	49 kg, 39 kg on infantry tripod

KARANCHO VERSATILE WEAPON MOUNT

The Karancho is a cradle mount for the 14.5 mm KPVT heavy machine gun with variable mounting options - either a single leg adaptor for use on pick-up trucks or boats or a tripod for use by infantry in their defensive positions. Optionally a pintle mount can also be offered.

The Karancho gun mount is equipped with a recoil limiting mechanism and should supports for the shooter which ensure high stability during firing.

MK 93 MOD 2 SINGLE MOUNT

This mount seamlessly integrates M2/M2F HMGs on various vehicles, transforming them into gun trucks for light infantry and special operations. It also provides a stable platform for defending fixed sites, featuring a patented buffer for precise firing.

PARAMETERS	
armor material	Hardor 500
mount material	13 kg
ground sheet material	84 kg
shield assembly	40 kg
support legs and main carrier	50 kg
pallet stackability	5 kg – single mount 10 kg – dual mount

DUAL MOUNT

The dual M2 is versatile solution for multiple platforms which can be integrated as on vehicle and small boats. Thanks to the special pattented buffers the mounted gun can quickly respond to the UAV presence and other small targets.

MEDIUM CALIBER GUNS

2A42

30 mm AUTOMATIC CANNON

The 2A42 is a 30 mm automatic cannon used for a variety of purposes, including anti-aircraft defence, anti-surface target engagement and ground support roles. It can be mounted on armoured vehicles, infantry fighting vehicles, helicopters and selected fixed-wing aircraft.

PARAMETERS 2A42

calibre	30 × 165mm
ammo used	AP(DS), AP-T, HE, HEI, HE-T, HETP-T, TP
length	3,027mm
weight	115kg
barrel weight	38.5 kg
firing speed – low cadency	200 – 300rounds/min.
firing speed – high cadency	550 rounds/min.
muzzle velocity	880 m/s (AP-T) - 1 200 m/s (APDS)
max. range	10,300 m
effective range - ground targets	4,000m
effective range - aerial targets	2,500m

ROCKET-PROPELLED
GRENADE LAUNCHER

RPG-7

ROCKET LAUNCHER

The **RPG-7** is a shoulder-fired, man-portable anti-tank rocket launcher designed to engage armoured vehicles and fortified positions. It's primarily used by infantry and irregular forces around the world. A key feature of the RPG-7 is its reloadable design. After firing, the spent rocket tube can be discarded and a new rocket can be loaded, again in a few moments.

PARAMETERS OPTICAL SIGHT PGO-7

magnification	2.7×
field of view	13°
resolution limit	28" at most
distance scale range	from 200 to 500 m
sighting angle scale graduation value	±0-50 dc
piece value of the lateral correction scale range	10 dc
length with eyepiece	140mm
height	180mm
width	62mm
weight	0.50 kg
weight with accessories and bag	0.95 kg

PARAMETERS RPG-7

calibre	40 mm
muzzle velocity	85 mm
initial velocity	120 m/s
effective firing range (target up to 2 m)	330 m
maximum firing range	500 m
combat rate of fire	4 – 6 rpm
flight time to self-destruction	4 - 5 s
barrel lenght	950mm
weight with optical sight	6.3 kg

AMMUNITION

EXCALIBUR ARMY offers a range of ammunition types. Our ammunition supply features a wide range of cartridges from 5.56 to 155 mm calibre, grenades and mortar mines. Our wide selection of calibres allows us to cater to the varying requirements of a range of military units, ensuring that they have access to the best equipment to meet their operational needs.
