

# Sporting rifle M808

This new sporting rifle is based on authentic Mauser system. Main features of this rifle are reliable design, robustness and long service-life.

The barrel is highly accurate and precise and it is made of chrome-vanadium steel, by cold forging.

Finish of the metal parts is fine and anti-reflective.

The receiver of the rifle is of polygonal shape and it has a Picatinny rail (both parts are made of one block of steel).

The rail provides low assembly of optical-electronic devices and their use increases accuracy and precision of the rifle.

Assembly barrel-receiver provides continuous movement of the bolt.

The rifle has mechanical safety.

Trigger mechanism - DAT (the possibility to slightly move the trigger forward and get small trigger pull).

The magazine is detachable, made of polymer.

The stock is made of quality walnut, in two versions:

- "Varmint" stock with thumb hole
- "Bavarian" stock with high cheek pad

LIBER (mm)	ROUNDS CAPACITY	WEIGHT (KG)	BARREL LENGTH (mm)	OVERALL LENGTH (mm)
22 - 250 Rem.	5+1	4.0	650	1,192
