TX 200P STUN GUN

TX 200P STUN GUN

TX 200P is designed to stop violent and illegal activities of individual, while it has no mortal effect to the suspect.

Ideally to be used for patrols on the streets and in traffic stations, hospitals, courts of justice, prisons, etc.

SAFE to use - Proven non-mortal to the suspect.

FAST to use - Effective to control the suspect immediately.

An immediately available back-up shot in case missing the first shot.

EASY to use - Stun the suspect in close range or in a distance by pulling trigger; Laser aiming .

TX 200P STUN GUN

Dual Cartridges, Dual Lasers

TX200P is designed with an immediately available back-up shot in case missing the first shot or multiple targets, and two lasers to enhance the accuracy of shooting"

Compared with red laser light, green laser light is much more clear in the sun during the day.

Item	Specification
Model	MD-TX200P
Dimension	202mm*107mm*42mm
Weight	<460g
Output voltage	55±5KV
Output current	<2mA
Pulse frequency	19±1HZ(PPS)
Motive force	High Pressure Gas (N2)
Maximum range	5 meters (Best to use within 3-5meters)
Laser	Power<5mW, wavelength 630-650nm
Battery	7 .4V, I 400mAh, for over 450 times of 5-second electric stun
Operation temperature	-40°C-55°C
Digital display	Power level, low power warning, electric stun timing etc.
Safety protection	Manual-stop , Short pressing for 5s, long pressing for 15s
Accessories	Cartridge x 4, Battery, USB type C, Holster, Storage case

BWC Activation(Option)

HUSHA TX200P has built-in Bluetooth module. when the safety switch is turned on.

Bluetooth signal will be sent out to activate body worn camera nearby into record mode, to ensure law enforcement evidences are recorded in time.

TX 200P STUN GUN

Back-up shot

An immediately available back-up shot in case missing the first shot.

Safety current

Less than 2mA, safe to human body (Conforming to International Standard)

5Sec Countdown

During electric stun performing, the digital display shows 5 seconds countdown.

Safety Switch

Ambidextrous safety switch with green mark of flash lighting; can be cut off at any time for safe use.

LED light

Designed with LED light, which greatly improves users' vision at night.

BWC Activation (option)

When the safety switch turned on, body worn camera nearby will be activated into record mode

ARC Switch

Only electric shock whenever loading a cartridge or not, long pressing for 15s, manual-stop

Stun in distance

Applied to control the suspect in a distance, maximum range in 6 meters

Stun in close range

Applied to attack the suspect in close range, without loading a cartridge

Laser Aiming

Designed with green laser light, which is clear in the sun during the day.

Rechargeable

Apply for Rechargeable and non rechargeable battery

Rechargeable

Apply for Rechargeable and non rechargeable battery

Rechargeable

Apply for Rechargeable and non rechargeable battery.

Safety current

Less than 2mA, safe to human body (Conforming to International Standard)

5Sec Countdown

During electric stun performing, the digital display shows 5 seconds countdown.

Safety Switch

Ambidextrous safety switch with green mark of flash lighting; can be cut off at any time for safe use.

Auto-protection

Auto-lock after 3 continuous 5sec electric stun

BWC Activation (option)

When the safety switch turned on, body worn camera nearby will be activated into record mode

IP57 Ingress Protection

Working under rainy season and high humidity environment normally.

Stun in distance

Applied to control the suspect in a distance, maximum range in 6 meters

Stun in close range

Applied to attack the suspect in close range, without loading a cartridge

Laser Aiming

Designed with green laser light, which is clear in the sun during the day.

LED light

Designed with LED light, which greatly enhances users' vision at night

Data function

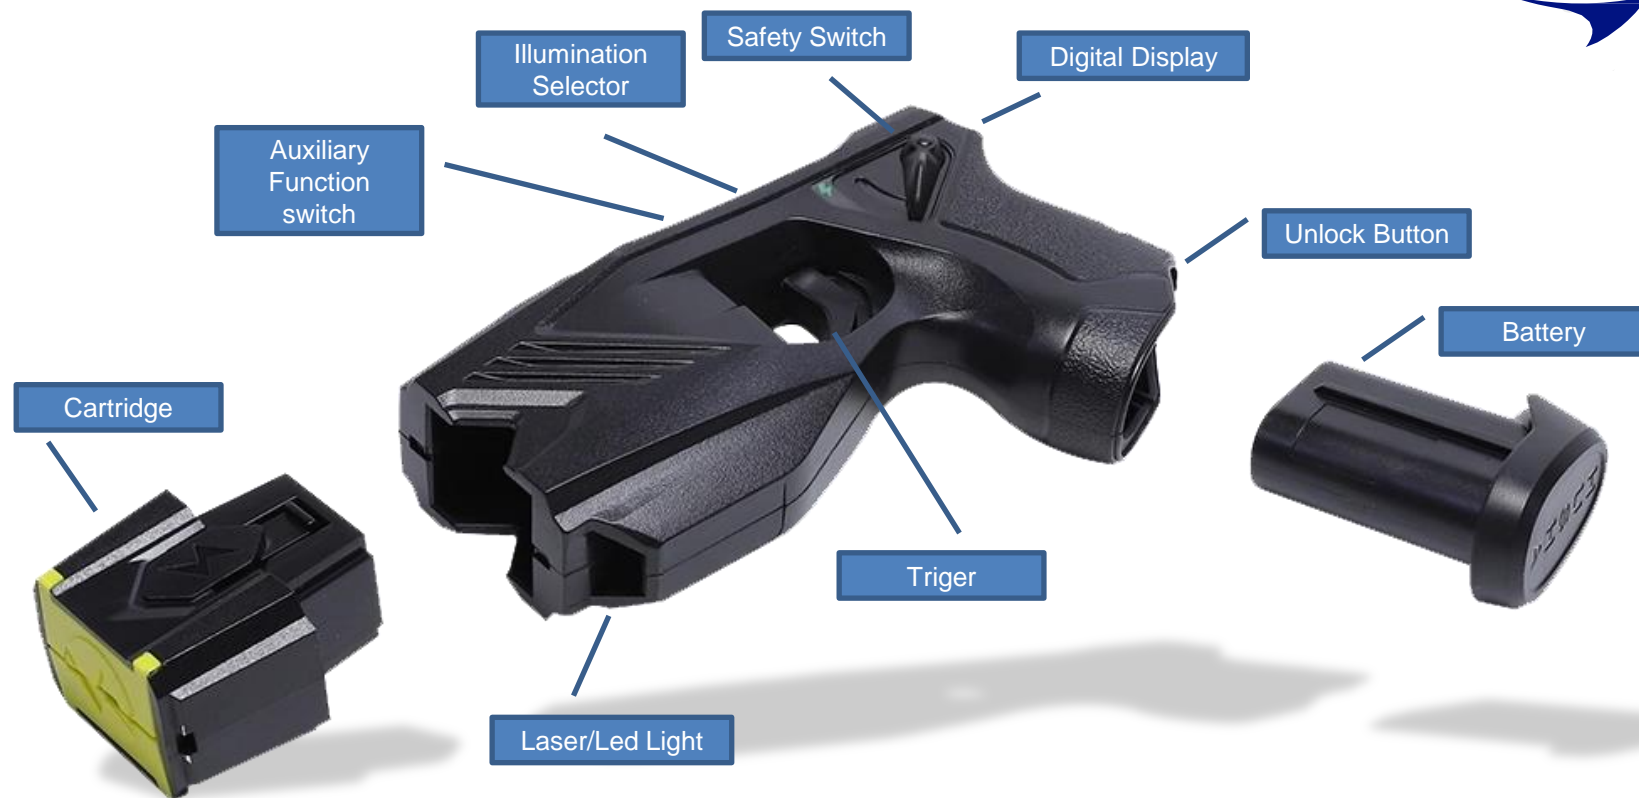

Designed with functions of data recording and downloading
