

GLOCK WATCH GLOBAL

PRECISION & PERFECTION

DESIGN & TECHNOLOGY

CLASSIC GLOCK PISTOL ELEMENTS

Featuring some of the most iconic GLOCK pistol design elements, the GLOCK Watch Global is a must-have for every GLOCK fan.

SOLAR POWERED

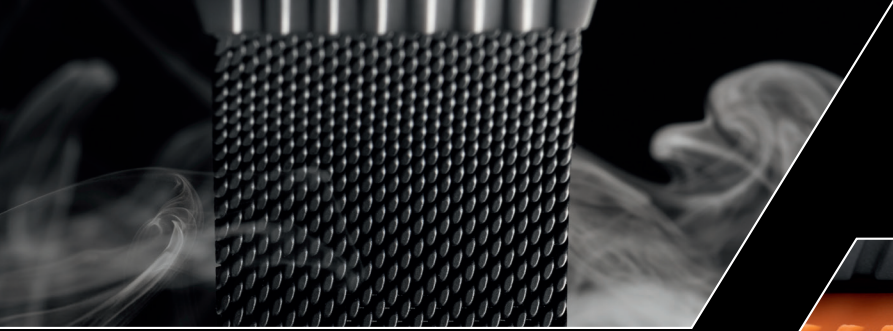

Thanks to the solar panel on the dial, the watch can be charged at any time with the help of day- or artificial light and runs for six to twelve months when fully charged.

VERSATILE WRIST BAND

The innovative interchangeable wrist band system allows to easily change the look by changing colors.

TESTED AND PROVEN BY GLOCK ENGINEERS

The GLOCK Watch Global has successfully passed all tests for corrosion resistance, extreme temperatures, watertightness, vibration and scratch resistance.

GLOCK PRECISION

More than 40 years of innovation have taught us how outstanding ideas lead to global success. With the interdisciplinary team of the GLOCK Precision brand, an Innovation Center was created in addition to classic research and development in the GLOCK Group. Here, not only with expert knowledge and visionary thinking, but also with a lot of scientific curiosity and enthusiasm, we work on future-oriented developments. The dynamic team at GLOCK Precision is actively helping to shape the future of the GLOCK Group.

In the new MakerSpace at the Austrian location in Velden am Wörthersee, special products and extraordinary customer experiences are developed. These are designed together with specialists from the company's own divisions and experts from all over the world in direct exchange with the global GLOCK community. Stay tuned!
