

S-PRO Pistol Stabilizer Conversion Kit

S-PRO is our next-level pistol conversion kit, featuring a spring-loaded stabilizer (which can be converted to a buttstock by removing the included brace attachment), MLOK mounting options, and broad compatibility.

S-Pro is compatible with Glock, Canik & Walther PDP.

We will soon be adding support for the SIG X Macro with more to follow.

The unit is designed to be modular, and using it with another compatible gun will only require swapping a small adapter piece, which will be sold separately.

- Metal frame
- MLOK-compatible front shroud
- Push button release spring loaded stabilizer/buttstock
- Modular unit – swap out adapters to use the same platform for different pistols
- No tools are required to install
- Compatible with high-profile slide-mounted optics
