

PP-61MK GOOSE DAY AND NIGHT SIGHT

The sight PP-61MK is designed for replacement of day sight PP-61A (AM) in turret machine gun mount of BTR-60, BTR-70 armored personnel carriers and BRDM-2 armored reconnaissance and patrol vehicle (hereinafter referred to as objects).

The sight PP-61MK provides 24 h passive detection of targets, aimed firing using machine guns of the object in the daytime at a range of up to 2000 m, at night without IR-illuminator up to 600 m.

The sight is installed onto the standard site of the day sight PP-61A (AM). The sight replacement doesn't require structural changes into the turret of the object.

Original technical solutions applied in the structure of the sight provide a suitable operation and exclude the necessity of gunner re-training.
