IA-AS001 Anti Riot Shield

TECHNICAL CHARACTERISTICS

- a. The material is molded and transparent polycarbonate with at least 4 mm of thickness;
- b. Dimensions between 60 x 90 cm and 70 x 100 cm;
- c. On the interior of the shield there can be written LOGO on black, over a transparent rectangle with 30 x 13 cm, with the dimension of the letters in accordance with, totally visible from the exterior;
- d. With inside position for the stick, allowing easy handling;
- e. The exterior edge will not inflict wound or trauma, even after being smashed (will not be deformed). The edge will have black rubber, being well welded to the shield, having not the possibility of dissociation.
- f. Protection and transport cover, with flexibility, allowing a fast extraction of the shield, keeping outside the black handling.

The screws or the rivets used will be of inoxidable steel with rings on the interior and on the exterior, in order to increase their resistance and avoid the breaking of the shield.

- Material: UV stabilized polycarbonate sheet with 95% transparency
- Shape: rectangular
- Length: 1200 ± 10 mm
- Breadth: 600 ± 10 mm.
- Thickness: 3.0 tp 4.00 ± 0.50 mm.
- Weight: 3.20 kgs ± 100 gms

Sizes

- 120*50*4cm
- 90*50*3cm,
- 90*60*3cm,
- 100*50*3cm,
