 Minimum focusing distance, m: 10
 Operating Temperature, °C: -30...+40
 Tripod Mount, inch 1/4, 3/8
 Dimensions mm : 240x76x110
 Weight, kg: 0.7

FEATURES

Changeable magnification

The Yukon 20-50x50 is perfect for detailed long-range observation. For prolonged observation the use of a tripod is recommended. The scopes are outfitted with a ¼ inch and 3/8 mounts to be installed on a tripod.

Yukon Spotting scopes. Orientation cue

The Scout spotting scopes are outfitted with a detachable plastic orientation cue on the housing for tentative aiming (especially for using on tripod). After preliminary guidance, the position of the scope is fixed, and further guidance is made with fine adjustment tripod screws.

Protective lens caps

The objective lens and eyepiece are protected with rubber caps. The lens cap can be slid aside or back down the body when observing. The lens cap is permanently attached to the scope's body to prevent it being lost.

Rubber armor body

The body of the Scout scope is rubber-armored and water-resistant. Rugged body coating guarantees secure grip for hand-held use protects the device's body against splashes and dust.

Lightweight and compact

The Yukon 20-50x50 features compact size and light weight. The spotting scope is supplied with a portable carrying case, hereby one can carry it conveniently on a waist belt.
