### BUILT-IN LASER IR ILLUMINATOR

Viewing range has been substantially increased due to the use of a built-in IR Illuminator in the L series of the Sentinel NV rifle scope. As compared to LED diode based IR Illuminators, laser Illuminators feature enhanced efficiency (operating range in similar conditions, quality of light spot) and essentially lower power consumption. All Laser IR Illuminators used in Yukon & Pulsar night vision devices comply with Class 1 laser safety according to standard IEC 60825 (Class 1 includes lasers and laser systems not able to produce radiation level hazardous for the human eye; Class 1 radiation is harmless for the eye even in case of long-time direct observation). Design of the laser IR Illuminators is patented by Yukon Advanced Optics Worldwide.

### FUNCTIONAL RETICLE

The reticle in the Sentinel rifle scope has brightness adjustment and features two scales – a horizontal scale for measuring distance to the object with known width; and a vertical scale, which enables adjustment of the aiming point at a distance of 15,25,50 and 100 m. Reticle colour can be switched from red to green.

### REMOTE CONTROL

The remote control duplicates the "on/off" function of the device and IR illuminator. The third button is intended for a quick start-up of the rifle scope and IR illuminator (the device works only when the button is kept pressed). This is very convenient when constant observation is not conducted in order to find the appropriate position, take aim and shoot.

### TITANIUM BODY

The Sentinel is remarkable for its modern, light weight and rugged design due to modern plastic and Titanium employed in the riflescope's manufacture. The riflescope can operate under precipitation of any intensity.

### PROTECTIVE LENS CAP

Protective lens cap is permanently attached to the body to prevent it being lost and can be slid back down the body when observing or shooting.

### WEAVER RAIL

The Weaver rail fixed on the left side of the body is used to accommodate additional accessories (IR flashlight, DSAS, red dot laser).

## MAIN FEATURES

- INCREASED VIEWING RANGE
- BUILT-IN LASER IR ILLUMINATOR
- RETICLE WITH RANGE FINDING SCALE
- INTERNAL FOCUSING LENS
- REMOTE CONTROL WITH SECURE ATTACHMENT
- WEAVER MIL-STD-1913 ACCESSORY RAIL
- PERMANENTLY ATTACHED LENS CAP
- USER CHOICE OF RETICLE COLOUR (RED/GREEN)
- STABILIZED POWER SUPPLY
- LOW BATTERY INDICATOR

## SPECIFICATIONS

PRODUCT NAME	Sentinel 2.5x50L	Sentinel 3x60L	Sentinel 2.5x50	Sentinel 3x60
MODEL #	26017T <b>NEW</b>	26018T <b>NEW</b>	26015T	26016T
Magnification, x	2.5	3	2.5	3
Lens diameter, mm	50	60	50	60
Generation	1	1	1	1
Field of View, degree	13	11	13	11
Eye Relief, mm	45	45	45	45
Built-in IR-illuminator, type	Laser	Laser	LED	LED
IR Wavelength, nm	780	780	805	805
Equivalent IR Power, mW	150	150	100	100
Range of detection, m	200	220	150	170
Operating Temperature, °C	-30 ... +40	-30 ... +40	-30 ... +40	-30 ... +40
Dimensions, mm	270x90x100	307x90x100	270x90x100	307x90x100
